- **Special and easy installation, no damage to the building**

- **Split screen feature enables display of message ticker**

- **Remote function for your convenience and high secrecy**

- **Lock protect for secure multimedia cards and files**

Application.

This new range of LCD displays is purpose built to operate as an Advertising Display suitable for applications in retail and public service such as hospitals, financial institutions and places of entertainment such as in a gym or cinema. They are supplied with a wall mount for mounting in landscape orientation.

Each display includes an integrated media player that will accept CF or SD memory cards or USB memory sticks.

LCD Enclosure Global – Anything else is a compromise.

If you have an application where a continuous display of images or text is required and where the data is only changed occasionally but with ease, then this is a very cost effective solution.

Simply insert a SD Memory Card and power on. The screen automatically starts playing the images, video and music that are loaded onto the card. You can set the play order and interval time of each slide and start and stop times, giving you complete control over every aspect of your digital presentation.

Model	PF32H1
