- **Split screen feature enables display of message ticker**
- **Remote function for your convenience and high secrecy**
- **Lock protect for secure multimedia cards and files**

LCD Enclosure Global - Anything else is a compromise.

Applications.

This new range of LCD displays is purpose built to operate as a digital poster suitable for applications in retail; public service such as hospitals, financial institutions and places of entertainment such as a gym or cinema. They are supplied with a wall mount for mounting in Portrait mode and can also be mounted in landscape too.

Each display includes an integrated media player that will accept CF or SD media cards or USB memory sticks.

If you have an application where a continuous display of images or text is required and where the data is only changed occasionally but with ease, then this is a very cost effective solution.

Simply insert a SD Memory Card and power on. The screen automatically starts playing the images, video and music that are loaded onto the card. You can set the play order and interval time of each slide and start and stop times, giving you complete control over every aspect of your digital presentation.

Specifications.

Model	20V
Display	20"
Resolution	1600 x 1200
Size(mm)	485 x 587 x 33
Display area(mm)	306 x 408
